DEVELOP A MOBILE APPLICATION

This is the complete layout of the mobile app

```
when Clock1 **. Timer

do set Web1 **. Get

when Web1 **. Get

when Web1 **. Get

when Web1 **. GotText

url responseCode responseType responseContent)

do set TextBox1 **. NumbersOnly ** to block up in pairs key pairs

notFound ** not found ** not found **

set TextBox2 **. NumbersOnly ** to block up in pairs key pairs

notFound ** not found **

notFound **

notFoun
```

This is the functions runs behind the textbox

```
when Button1 v .Click
do set Web2 v . Url v to | https://node-red-pmhvi-2022-11-18.eu-de.mybluemi.... call Web2 v .Click
do set Web2 v .Click
```

This is the functions runs behind the button
